

Why you should attend?

#dhc2026

1

Community-Based Family Physicians and NPs: Learn practical strategies to reduce documentation burden, optimize your EMR, and use digital tools and AI to create more time

2

Specialists: Discover innovative approaches to referral management, specialty workflows, patient communication, and digital tools that can improve access, efficiency, and clinical capacity.

3

Clinic Staff and Office Executives/Managers: Gain practical tips to reduce inbox overload, streamline administrative processes, improve team workflows, and create capacity across the practice. Presented by Office Executives who know your workflow and pain points.

4

OHTs, PCNs and Healthcare Leaders: Support clinicians in your area to learn together and gain valuable insights - a great way to engage PCN community clinicians to learn, collaborate, and identify scalable digital solutions that can support transformation across your region.

5

Digital Health Vendors and Partners: Hear directly from clinicians about the challenges they are trying to solve and gain insight into emerging needs related to AI, interoperability, privacy, security, and practice efficiency

6

Anyone Driving Change in Healthcare: Connect with peers, learn from real-world success stories, and leave with practical ideas you can implement immediately in your organization.

The Digital Health Conference is affordable, CME-accredited and ideal for your clinic and staff to learn about available support to help solve technology pain points.
